Alexandra Myers

City, Oregon • (###) - ### - #### • email@oregonstate.edu • GitHub

Summary

I am a Data Science student at OSU interested in applying data-driven solutions to biotechnology and life sciences. My background in bioscience technology has given me experience with hands-on laboratory workflows, biological data collection, and quality control processes.

Education

Oregon State University *September 2026 - June 2033 (Expected)*
Bachelor of Science, Data Science Corvallis, OR

Portland Community College *September 2020 - December 2023*
Associate of Applied Science, Bioscience Technology Portland, OR

Experience

Laboratory Technician *January 2026 - Present*
Company City, OR

- Conduct high-throughput quality control (QC) on RNA samples utilizing Fragment Analyzers to evaluate sample integrity and suitability for downstream DNA library construction and sequencing.
- Review, verify, and input sample quality data into Laboratory Information Management Systems (LIMS), ensuring strict accuracy and data integrity before submitting records for downstream processing.
- Cross-trained across DNA Library QC and Sequencing team workflows during early lab establishment, providing crucial operational flexibility during initial launch transitions.

Antibody Engineering Hackathon Participant *August 2025 - August 2025*
Digital World Biology Remote

- Collaborated with a cross-functional team to analyze how epitope mutation in cancer proteins affect antibody binding and treatment resistance.
- Utilized computational tools and bioinformatics databases (iCn3D, RCSB PDB, cBioPortal, IEDB, and CEDAR) to analyze molecular structures and mutation data.
- Aggregated and structured project findings into a standardized database to support downstream data accessibility.

Production Assistant Scientist *January 2025 - February 2025*
Sedia Biosciences City, OR

- Contributed to the manufacturing of HIV diagnostic testing kits within a regulated laboratory environment.
- Maintained full regulatory compliance and precise documentation in accordance with cGLP, cGMP, and Good Documentation Practices (GDP).
- Executed quality-focused workflows while ensuring data integrity across batch records and laboratory processes.

Skills

Technical Skills: Microsoft Excel, Google Drive
Transferable Skills: Attention to Detail, Team Collaboration, SOP Compliance, Quality Control
